# About the CHAUVIN ARNOUX GROUP

Founded in Paris, France in 1893, **CHAUVIN ARNOUX** has spent the centuries since then developing its expertise in the design, manufacture and marketing of measuring instruments for professionals.

From handheld instrumentation to fixed electrical equipment and energy performance systems, and from control of the entire thermal process chain to industrial metrology, the **CHAUVIN ARNOUX** Group's offering meets every customer requirement across all the sectors (self-employed electricians, industry, government bodies, etc.).

**“CHAUVIN ARNOUX is a major player in the measurement market in France and internationally.”**

## A Few Figures

- 10 subsidiaries worldwide
- 1,000 employees
- 8 production sites
- 6 R&D departments worldwide
- 11% of revenues invested in R&D
- Turnover of 100 million euros

### Your partner:

- energy performance
- regulatory testing
- environmental measurements
- installation supervision and sizing.

### Made in France

The French family company Chauvin Arnoux designs and manufactures 80 % of its products in the R&D Centres and production sites owned by the Group. Its three sites in Normandy and its site at Meyzieu, near Lyon, manufacture printed circuit boards, mechanical parts and temperature sensors, while also handling the assembly of measuring instruments for all the Group's brands.

## 5 expert measurement companies in one Group

Portable test and measurement instrumentation

Metering, measurement and energy performance

Temperatures in industrial processes

Metrology and regulatory testing

Optical sensors for quality control in the laboratory and on in-line processes

A CHAUVIN ARNOUX innovation

Thanks to the TrueInRush function, the clamp automatically determines the type of signal and the level of current in the installation and then adapts the algorithm and measurement procedure to capture the next current surge.

**C.A 1950 and C.A 1954** delivered in site-proof case with 4 NiMH batteries and 1 battery charger, 1 micro SD HD card, 1 USB cable, 1 Bluetooth earpiece, the CAmReport software on CD ROM, User's Manuals and a measurement report.

### CAmReport software included

The CAmReport software is supplied as standard with the C.A 1950 & C.A 1954 cameras.

It offers all the functions needed for reliable analysis of your measurement results:

### Strengths

- Cursors (automatic display of the temperature at the chosen point)
- Thermal profile (automatic display of the Min/Max/Avg temperatures of the line)
- A square or circle for zone analysis
- Results tables quickly and automatically display all the information/analytical tools for the thermogram
- Polygons and polylines for more precise analysis of certain zones in the thermogram
- User-enhanceable emissivity table supplied as standard
- Ready-to-use, customizable report templates

Reports are created automatically using the various templates available

THE BEST  
SOFTWARE  
FOR ANALYSING  
THERMOGRAMS!

# TESTING AND ELECTRICAL SAFETY

## Insulation and Continuity Testers

### Discover our new range:

- > Test voltage from 10 V to 1,000 V / 200 GΩ
- > Manual, Lock, Timer and PI / DAR Ratios modes
- > Visual Pass / Fail: red / green
- > 200 mA / 20 mA continuity with active protection without fuses
- > Measurement of V (TRMS & DC), F, Ω, kΩ, C and cable length
- > ΔRel mode & configurable alarms
- > Storage of measurements in memory

### Choose your tester to match your needs:

#### C.A 6536

##### "Special & ESD" applications

With a variable test voltage from 10 V to 100 V in 1 V increments, this model is intended for special applications in sectors such as avionics, space and defence, which often require a low test voltage and strict adherence to the programmed value. With appropriate electrodes, the 10 V and 100 V test voltages can also be used for electrostatic discharge applications.

#### C.A 6532

##### "Telecommunications" applications

- Insulation tests at 50 V or 100 V
- Specific functions: measurement of resistance, capacitance, leakage current and AC voltage.
- Measurement of the difference in resistance between 2 wires in a pair by using the ΔREL function.
- Display of the length of the line being tested, thanks to programming of the linear capacitance in nF/km.

#### C.A 6522, C.A 6524, C.A 6526

##### "Industrial Maintenance" applications

Periodic insulation tests on installations and equipment help to prevent incidents by setting up preventive maintenance designed to detect ageing and premature deterioration of their insulation characteristics:

- Measurement of insulation over a programmed duration
- Alarms and Pass/Fail indicator light (C.A 6526)
- PI and DAR ratios to determine the quality of the insulation, with the advantage of not being significantly influenced by the temperature
- Storage in memory to compare the measurement histories

#### C.A 6534

##### "Electronics" applications

Thanks to its wide test-voltage range from 10 V to 500 V, this model covers the specific requirements of the electronics industries, for both low-current applications and power stages. Its measurement range is from 2 kΩ to 50 GΩ.

## Remote control probe

The remote control probe is an accessory specially developed to make your insulation tests in the field simpler and quicker.

- Insulation measurement can be triggered with a single press on the probe's yellow button.
- Equipped with a torch function, this probe effectively lights the point of measurement.
- Thanks to the tester's backlit screen, the measurement results are visible at all times, including in places with poor lighting.

Reference P01102092A

## DataView® software

**DataView®** software, with its Megohmmeter Transfer module, automatically recognizes the instrument when it is connected to the PC and opens the corresponding menu. This tree-structure menu offers users direct access to the data recorded in the instrument and its configuration.

The other functions available are:

- Activation of remote tests
- Real-time display
- DAR and PI references
- Graphical plot of the tests
- Generation of measurement reports

## Earth and resistivity tester with adapter for pylon earth measurements

The C.A 6472 can be used to carry out a quick but comprehensive survey of all earthing configurations. When used with the C.A 6474 accessory, it allows users to measure the earth resistance of pylons.

------------------------	--------------------------	--------------	-----------------	-------------------	--------------

### MA110 model

Measurement from 20 mA.  
Can be connected to the AC voltage input (mVAC / VAC) of any multimeter or measuring instrument equipped with Ø 4 mm female banana plugs.

### Three-phase MA130 model

Can be connected to the AC voltage inputs (mVAC / VAC) of any power analyser, logger or measuring instrument equipped with BNC plugs.

### MA200

<b>600 V</b> CAT IV	<b>1000 V</b> CAT III	<b>1 MHz</b>
------------------------	--------------------------	--------------

### MA200 model

Equipped with a BNC output and can be connected to all types of oscilloscopes. Offers high bandwidth.

### Functions

- > Configuration of all the functions of instruments connected to a PC or via Bluetooth
- > Recovery of the recorded measurement data
- > Backup of measurement files
- > Opening of saved files
- > Processing and creation of reports (EN50160)
- > Export into an Excel spreadsheet
- > Export in .pdf format
- > Database management

### Additional info

The DataView® software

- > Automatically recognizes the instrument connected when it is connected to the PC and opens the corresponding menu. Users then have direct access to the configuration and to the saved data
- > Includes a large number of predefined report templates for quick generation in compliance with the applicable standards. Users can create their own models to fit their needs and add their own comments directly

\* Instrument + XRGST1 pH electrode: 1.00 to 12.00 pH

## ACCESSORIES AND REPLACEMENT PARTS

XRGST1 pH combination electrode with built-in temperature sensor	P01710051
XRPTST1 ORP combination electrode with built-in temperature sensor	P01710052
pH 1.68 buffer solution (NIST)**, 125 mL	P01700105
pH 4.01 buffer solution (NIST), 125 mL	P01700106
pH 7.00 buffer solution (NIST), 125 mL	P01700107
pH 9.18 buffer solution (NIST), 125 mL	P01700108
pH 10.01 buffer solution (NIST), 125 mL	P01700109
220 mV ORP buffer solution, 125 mL	P01700114

468 mV ORP buffer solution, 125 mL	P01700115
Shockproof sheath	P01710050
Set of 3 beakers	P01710056
8-pin DIN to BNC & Jack adapter***	P01295501
8-pin DIN to S7 & Jack adapter	P01295502

\*\* Delivered with a quality certificate guaranteeing compliance with the NIST (National Institute of Standards and Technology) and DIN 19266 standards

\*\*\* Connection adapters for Chauvin Arnoux pH/redox and temperature sensors

## State at delivery

1 C.A 10101 pH-meter delivered in a site-proof case with 1 XRGST1 pH combination electrode with built-in temperature sensor, 4 AA or LR6 alkaline batteries, 1 protective sheath mounted on the instrument, 2 ready-to-use buffer solutions (compliant with NIST/DIN) with pH 4.01 and 7.00, 2 plastic beakers, 1 USB - micro USB cable, 1 wrist strap, quick start-up guides (one per language).
