

MEMO & ULYS Submeters

Single-phase or three-phase, with direct connection or connection via CT

Integrated communication: Ethernet, M-Bus, Modbus

Metering, submetering, energy monitoring, rebilling

**Comprehensive
solution for
implementation of a
metering plan**

Measure up

Measuring to learn, allocate and

Energy efficiency is not just a social project, but a major economic issue in the context of **an action plan for control** sectors of the economy and all fields of activity, seen as a whole.

The new **regulations and certifications** for installations, implemented at national level to boost savings and reduce the

Monitoring and operation

All single-phase feeders up to 100 A

No disconnection

Installation and quick, simple implementation of the meters linked to our non-intrusive sensors

Energy monitoring

Metering solution for the energy monitoring market

Energy balance

Production / consumption

ULYS MCM – Multichannel meter

Management of grouped feeders

- Compact: 18 three-phase meters in one
- Quick implementation
- Compatible with a large number of sensors

ULYS TT - M Ethernet

METER – MEASURE

COLLECT – HISTORIZE

ANALYZE – ACT

and monitor

and reduction of energy consumption. The incentive measures developed by all the policies worldwide target all impact on the environment, help to meet the need for optimization of installations' energy performance.

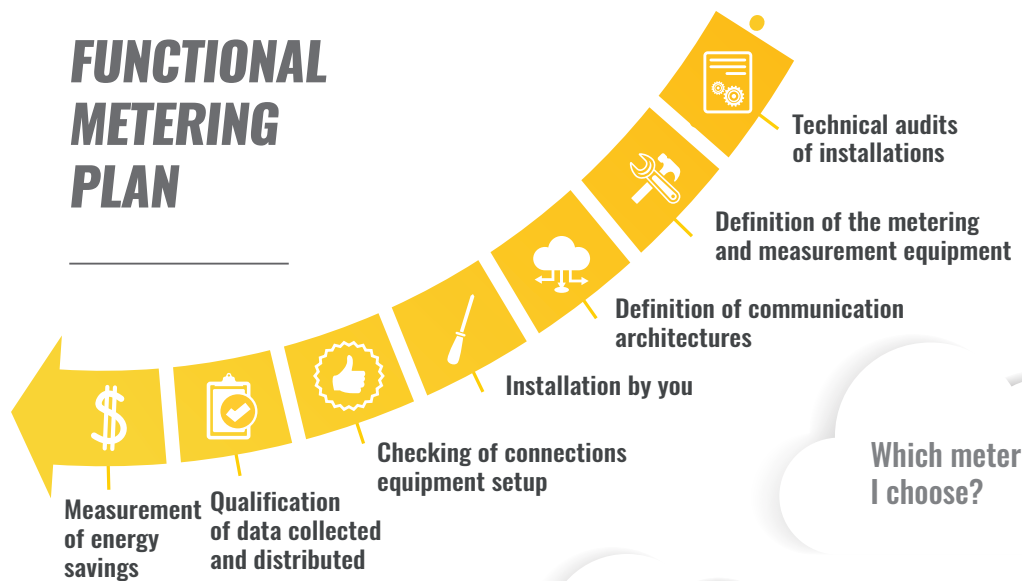

Monitoring
compatible with all
monitoring solutions on the

From construction to industry
HQE, RT2012/ 20, LEED, ISO 50001, BREAM...

**Accompanying you at every stage
of your project!**

FUNCTIONAL METERING PLAN

Which meter should I choose?

Where should I install my meters?

How do I process my data?

Are my data reliable and consistent?

Management of isolated feeders
connection to your existing Ethernet network.
range of the consumption data history
accessible via its WEB pages / FTP push

MID METERS

Mandatory for rebilling of active energy on the basis of consumption readings by index difference.
Chauvin Arnoux Energy's active energy meters are MID-certified. Their names include the indication «-M», e.g. ULYS MD45-M

MEMO & ULYS M

Strengths of ULYS MCM

-  **Compact**
18 meters in one
-  **Small size**
Thanks to its innovative design
-  **Compatible**
With a large number of sensors
-  **Quick to set up**

From electrical measurement to managing energy performance

Drawing on long experience in energy monitoring of applications, **Chauvin Arnoux Energy** develops **products and services** to simplify control of all energy consumption, particularly in the context of an **ISO 50001** approach.

Current transformers

Range of split-core or closed-core current sensors

- Current from 1 to 5,000 A
- CT technology (1 A, 5 A, 333 mV) or Rogowski coils or measuring shunts
- Wide offering for any type of conductor and any level of space constraints
- Easy to install while maintaining safety on the installation

Comprehensive monitoring of LV/HV power quality

Range of panel-mounted power monitors

- From 0.2s critical electrical monitoring to the collection of all-utilities metering data
- Analysis of the electrical feeder: alarms, recordings, harmonics, EN50160
- Compliance with the demanding electrical measurement standards: IEC61557-12, IEC62053-21/22

THE APPLICATIONS UNIT Chauvin Arnoux Energy

To accompany you:

- in the choice of the solutions to be implemented
- by commissioning the installations
- by training users on site or in our premises
