---------
 Warning
---------

1 - After the Install, the option "Save settings on exit"
and the language "English" are notched by default.

2 - "The version number of the driver of the USB adapter must be equal at least
to 6,5.
In the case of a first use, verify if the driver of the USB adapter / optical
serial has been installed.
If it is not, start by installing the driver. "Please run the program to install
the USB driver that is located at :
 -  For Windows XP ,:\\driverusb\\Windows_XP_S2K3_Vista_7.
 -  For Windows 7 and 8 ,: \\driverusb\\CP210x_VCP_Windows.
Then, follow the procedure:
 - Switch off the instrument.
 - Close the application.
 - Let USB cable between PC and device.
 - Start the device on 'SET- UP' position.
 - Run application.
